

Agency Management (AM)

The Agency Management application is designed to implement an integrated database for authors and contractors as well as to maintain records of copyright contracts and temporary service contracts and to significantly decrease the time needed for calculations and invoice creation.

The application consists of the following main functional components:

- Module for copyright contracts registration
- Module for temporary service contracts registration
- Codebooks

The module for copyright contracts registration entails the following:

- Author's personal data
- Copyright contracts
- Invoice creation
- General copyright contract
- Correction of contracts and invoices
- General copyright invoice creation
- Views

The Module for temporary service contracts registration

- Contractor's personal data
- Temporary service contracts
- Invoice creation
- General temporary service contract
- Correction of contracts and invoices
- General copyright invoice creation
- Views

The Codebooks include:

- Cities
- Partners
- Company parameters
- Codebook of activities
- Settlements
- Author's calculator

The core of the system is the electronic dossier for each author and contractor.

Finally, we would like to note that Elikosoft with its team is available to all clients interested in any kind of information.
