

Working Hours Registration System (WHR)

A combination of efficient program and special devices for registering the worker's attendance at the work place. It entails the following modules:

- Registration of working hours: registering the time of arriving at and leaving the work place, field work or work assignment, official or private absence, locating the worker
- Schedule and planning: planning activities on a daily, monthly and yearly basis; vacations, trips, field work
- Analysis and reports: reports on attendance for each employee separately and at company level, report on any time period (daily, weekly, monthly, yearly), analysis of absences, vacations, trips, both separately and in a group

Finally, we would like to note that Elikosoft with its team is available to all clients interested in any kind of information.
